

For people with lived experience of Cerebral Palsy and their whānau

Whānau of a child with cerebral palsy & adults with
cerebral palsy (up to 26 years of age)
Living in the Auckland Tāmaki Makaurau area

Kia ora! Talofa! Malo e lelei

Can you help us try out a new questionnaire about Respiratory Health?

**Contribute to growing
knowledge**

**Easy to complete
multi-choice questionnaire**

Takes 15 min

**The information is to help us identify early any possible breathing
or lung problems in young people with CP.**

[Click for Respiratory Questionnaire](#)

It will ask you about you or you/your child's:

- Description of cerebral palsy
- Eating and drinking abilities
- History of breathing problems, coughing or snoring
- Dental Health

We will also use 'data linkage' to share answers and your national health identification number (NHI) with the Ministry of Health, they will match it to any respiratory hospital admissions or medicines prescribed over a 12 month period.

Would you like to know more?
