

We invite you to take part in **Round 1** of the **CHESTi Study** – an international e-Delphi survey to agree the most important outcomes to measure in chest health for children and young people with cerebral palsy (CP).

What's Involved:

- This is the **first of 3** survey rounds.
- Available in 7 languages.
- Takes 10–15 minutes.
- Voluntary and confidential.
- Open until: **Sunday 5th October (23:59 UK time (BST/GMT))**

Your views will help shape future chest health care in children with cerebral palsy.

To take part, scan the QR code or click the link here:

<https://clinicaltrials.plymouth.ac.uk/surveys/?s=CPKT3ATWWHW3DJ4K>

You'll access:

- A short study video and summary
- Consent and registration form
- The main survey to rate chest health outcomes

Who Can Take Part:

- Parents/carers and young people (aged 8–25) with CP
- Healthcare professionals supporting children with CP
- Researchers or academics with interest in this topic

Please share this invitation with a parent/carer or a young person with cerebral palsy, so we can hear their lived experience views!

The survey link is available in 7 languages and open to all who are interested!
