

Volunteers needed

Can you help us with some research?

**We want to design a special Ankle Foot
Orthosis (AFO) just for you!**

We need children with movement disorders using AFO to help us design an ankle-foot-orthosis, which helps them do the activities that they wish to do!

Our goal is to make it super comfy and totally your style. We hope you'll love wearing it whether you're sitting, walking, or playing with your friends! By helping us, you're also helping doctors and other clinicians design better AFOs for kids like you, and you will also have a new AFO! So, are you ready to join our adventure?

If you accept to participate, we will interview you to find out about your awesome ideas for designing a new AFO, and then we will scan your leg; this helps us understand the shape of your leg better when we want to design your AFO. Then, you will test out your new AFO by walking on a treadmill, and we want to see how you walk with it. You can take your new AFO home!

If you are interested, please contact the study investigator below for more information and how to join!
